Upon the said amalgamation, equity shares of KEL would be issued to the shareholders of SAB. This is hereinafter referred to as the Transaction.

2. Indian Mattress Industry:

The mattress industry in India is dominated by the small scale and unorganized sectors. However, the mattress industry has transitioned over the last few years from a largely unbranded market to branded market. The branded market comprising large, mid-size and smaller manufacturers constitute around 34% of the market, with around 20-25 players spread across the geographies. The branded mattress market is expected to grow at a CAGR of ~13% over next 5 years to constitute 37.5% of the market by 2022. Implementation of GST has narrowed the price gap between branded and unbranded players leading to increase in opportunity for branded mattress players. Consumer driven factors such as increasing population, rising urbanization, and improvement in institutional infrastructure (housing, hospitality and healthcare segment) are key growth drivers for entire home & living industry including mattress market. However, the high share of branded players in the mattress market can be attributed to the efforts and investment made by mattress players to increase consumer awareness about quality mattresses through development of retail infrastructure and marketing activities. Mattress Industry has huge scope with high under usage of branded and readymade mattresses. The Indian mattress market is estimated approximately Rs.10,000 Crore of which approximately 75% has been dominated by cotton mattresses, which is majorly a low value unorganized market. Just about 20% of the total market for mattresses comprises the rubberized coir mattress segment. With remaining market comprising high end foam based mattress. The industry has grown at an estimated CAGR of 8-10% over the past 5 years, primarily on account of rising urbanization, increase in disposable income, increase in health related issues of the Indian population and increasing awareness about

sleep products. The industry has grown at an estimated CAGR of 8-10% over the past five years and expects to grow at 8-10% over next five years to reach a total market size of approximately Rs.13,000-14,000 Crore by FY2021.

The Company continued improvement in profit margins witnessed over the last two-three years, due to cost reduction measures and reduction in finance costs. KEL continues to exhibit comfortable gearing and coverage indicators, owing to the presence of limited external debt and healthy accretion to reserves. KEL has a strong

liquidity profile owing to generation of healthy operational cash-flows, low utilisation of cash credit facilities availed from banks and presence of sufficient cash balances and liquid investments as on March 31, 2018. - Details of intangible assets as on March 31, 2018.

7. Procedures Adopted in Carrying out Valuation:

The Valuation has been undertaken to determine the value of Equity Shares of KEL and SABIL as on March 5, 2019 in accordance with the Indian Valuation Standards issued by the Institute of Chartered Accountants of India (ICAI). ICAI has notified eight Valuation Standards (IVS). Valuers have to mandatorily comply with IVS for valuation engagements. IVS contain framework and principles for undertaking a valuation assignment –Its base, methods and process.

The projections provided by the Company are largely accepted after seeking necessary clarifications and explanations during review and discussion.

8. Valuation Bases:

Considering the terms and purpose of the valuation engagement, the appropriate Valuation base would be Fair Value.

Indian Valuation Standard 101 - 'Definitions' defines fair value as, "the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the valuation date".

9. Methodologies for Valuation:

Techniques for Valuation

Indian Valuation Standard 303 – 'Financial Instruments' and 301 – 'Business Valuation' gives reference to Indian Valuation Standard 103 – 'Valuation Approaches and Methods' for deriving fair value of the Company which states three valuation techniques which are as under:

Market Approach:

The market approach uses prices and other relevant information generated by market transactions involving identical or comparable (i.e. similar) assets, liabilities or a group of assets and liabilities, such as a business. The market approach often uses market multiples derived from a set of comparable.

The following valuation methods are commonly used under the market approach:

- **Market Price Method:**

This method uses the average trading price observed over a reasonable period while valuing assets which are traded in the active market.

- **Comparable Companies Multiple (CCM) Method**

Comparable Companies Multiple Method, also known as Guideline Public Company Method, involves valuing an asset based on market multiples derived from prices of market comparable traded on active market.

The market multiples are generally computed on the basis of following inputs:

- trading prices of market comparable in an active market; and
- financial metrics such as Earnings Before Interest, Tax, Depreciation and Amortisation (EBITDA), Profit After Tax (PAT), Sales, Book Value of assets, etc.

- **Comparable Transaction Multiple (CTM) Method**

Comparable Transaction Multiple Method, also known as 'Guideline Transaction Method' involves valuing an asset based on transaction multiples derived from prices paid in transactions of asset to be valued /market comparable (comparable transactions)

The transaction multiples are generally computed based on the following inputs:

- price paid in the comparable transaction; and
- Financial metrics such as EBITDA, PAT, Sales, Book Value, etc. of the market comparable.

Income approach:

Income approach is a valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e., discounted or capitalised) amount. The fair value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

The most commonly used income approach is Discounted Cash Flow Method which is explained hereunder:

- **Discounted Cash flow method:**

This method values the asset by discounting the cash flows expected to be generated by the asset for the explicit forecast period and also the perpetuity value (or terminal value) in case of assets with indefinite life.

Using this valuation method, future cash flows to the property are forecasted using precisely stated assumptions. This method allows for specific modelling of income associated with the property. These future financial benefits are then discounted to a present day value at an appropriate discount rate.

Cost Approach:

Cost approach is a valuation approach that reflects the amount that would be required currently to replace the service capacity of an asset (often referred to as current replacement cost).

The following are the commonly used valuation methods under the cost approach are as follows:

- **Replacement Cost Method;**

Replacement Cost Method, also known as 'Depreciated Replacement Cost Method' involves valuing an asset based on the cost that a market participant shall have to incur to recreate an asset with substantially the same utility (comparable utility) as that of the asset to be valued, adjusted for obsolescence.

- **Reproduction Cost Method**

Reproduction Cost Method involves valuing an asset based on the cost that a market participant shall have to incur to recreate a replica of the asset to be valued, adjusted for obsolescence.

Asset Approach:

It is a basic tenet that the shareholders' funds, as stated in the balance sheet, are represented by some assets. Methods that use the value of the asset and subtract from that the amounts owed by the entity to arrive at the value of Equity are asset backed methods.

Such methods follow the classical accounting equation i.e.: Assets – Liabilities = Equity

Certain assets, like land and building, goodwill and investments, if in the nature of surplus assets, may need to be revalued as on the date of the valuation, so that its intrinsic value is reflected in the value of the share.

This method is appropriate when future profits cannot be reliably estimated due to disruption of business or violent fluctuations, the company's assets are highly undervalued or when the company is on the verge of shutting down. This method is also used when an entity has

surplus assets or when income earned by the entity is significantly dependent on its assets base.

10. Approach to Valuation Engagement:

In connection with this exercise, I have adopted the following procedures to carry out the valuation:

- Discussion with the Company to:
 - Understand the business and fundamental factors that affect its earning-generating capabilities including strengths, weaknesses, opportunity and threat analysis and historical financial performance.
 - Enquire about business plans and future performance estimates.
- Analysis of information.
- Selection of appropriate internationally accepted valuation methodology / (ies) after deliberations.
- Determination of relative value of the companies.
- Arriving at Fair Value of equity Share of the Company.

Further, the value per share as per the aforesaid methods referred to in point 7 is presented in the subsequent paragraphs.

11. Valuation Methods followed:

- **The Valuation Date is March 05, 2019.**
- For the purposes of the valuation of the company, the following methods are rejected because of the reasons as mentioned hereunder:

Method	Reason for Rejection
Market Price Method	Since the shares of both the companies are not listed on a stock exchange, this method has not been considered.
Comparable Companies Multiple Method	Since there are not many comparable companies in similar business as KEL & SABIL are engaged in and no reliable data in respect of such companies is available in public domain, this method has not been considered.

Comparable Transaction Multiple Method	Since there are no comparable transactions entered into by the company, this method has not been considered.
Cost Approach	The both the Companies are going concern and an operating company not having any surplus assets. Accordingly, the replacement cost of assets would not represent the true value of the business and hence, this method has not been considered.
Assets Approach	Since both the Companies are going concern and an operating company not having any surplus assets, this method has not been considered.

12 Income Approach Method – Discounted Cash Flow Method

- I have been provided with the projected financial projections of the cash flows of the company for the years beginning from April 1, 2019 to March 31, 2024.
- I have not considered Weighted Average Cost of Capital (WACC) as there is no debt in the company. I have therefore considered it appropriate to undertake Capital assets pricing model to arrive at the Discount Rate.
- The risk free rate of return – being the yield on 10 year Central Government Bonds is approx. 7.37 %. Further, since KEL and SABIL are unlisted Companies, their beta is not available. However, Sheela Foam, a Mattress Manufacturing Company, is listed on Indian Stock Exchange, the weekly one year range and weekly two year range of Beta of Sheela Foam is 0.611 and 0.266 respectively. Hence, Unlevered Beta for the purpose of valuation has been considered as

0.50. The Risk Premium is considered @ 5%. Hence, the discounting rate comes to 9.87%.

- Based on the above, I have applied a discounting rate of 9.87% to the projected equity cash flows and arrived at the enterprise value.

Further, I have assumed the growth in cash flows post FY 2023-24 at 5%. I have reviewed the various information and documents on the projections furnished by the company. The resultant cash flow of the company and working of fair value per share as per DCF method is presented in Annexure 'A'.

13 Valuation and Conclusion:

Based on foregoing data, considerations and steps followed, I consider that the fair ratio of exchange would as follows:

Particulars	KEL-Value per Shares (Rs)	SABIL-Value per Shares (Rs)
Assets based approach	Not applicable	Not applicable
Market price approach	Not applicable	Not applicable
Earning approach (DCF method)	1360.65	4.11
Fair value per share (Rs.)	1360.65	4.11

Share Exchange Ratio: For every **331 (Three hundred and thirty one)** Equity Share of face and paid up value of Rs.10/-(Ten) in SABIL, **1 (One)** Equity Share of face and paid up value of Rs.5/- in KEL to be issued to the equity shareholders of SABIL.

INDEPENDENT AUDITOR'S REPORT

To The Members of KURLON ENTERPRISE LIMITED Report on the Audit of the Standalone Ind AS Financial Statements

1.0 Opinion

We have audited the accompanying standalone financial statements of **KURLON ENTERPRISE LIMITED** ("the Company"), which comprise the Balance Sheet as at March 31, 2019, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2019, and its profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

2.0 Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements Section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

3.0 Information Other than the Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Director's Report including Annexure to the Director's Report, but does not include the consolidated financial statements, standalone financial statements and our auditor's report thereon.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

4.0 Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

5.0 Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 6.1 (f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **KURLON ENTERPRISE LIMITED** ("the Company") as of March 31, 2019 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2019, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

1 Corporate information

Kurlon Enterprise Limited was incorporated in Mumbai, India on October 03, 2011, as a public limited company under the Companies Act. The Company is a subsidiary of Kurlon Limited and is engaged in the business of manufacturing/ trading in diverse areas such as Rubberized coir, Latex Foam, Polyurethane foam, Bonded Foam, Pillows, Spring Mattresses, Furniture, Furnishings, Sofas etc.

2 Significant accounting policies**2.1 Statement of compliance**

These financial statements have been prepared in accordance with Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India.

Except for the changes below, the Company has consistently applied accounting policies to all periods:

The Company has adopted Ind AS 115 'Revenue from Contracts with Customers' with the date of initial application being April 1, 2018. Ind AS 115 establishes a comprehensive framework on revenue recognition. Ind AS 115 replaces Ind AS 18 'Revenue' and Ind AS 11 'Construction Contracts'. The application of Ind AS 115 did not have material impact on the financial statements. As a result, the comparative information has not been restated.

Appendix B to Ind AS 21 'The Effects of Changes in Foreign Exchange Rates': On March 28, 2018, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency. The amendment is effective from April 1, 2018. The Company has evaluated the effect of this amendment on the financial statements and concluded that the impact is not material.

2.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial assets and liabilities which are measured at fair values. Further Defined Benefit Plans and Plan Assets are measured at fair value at the end of each reporting period, as explained in the accounting policies below:

Historical cost is generally based on the fair value of the consideration given in exchange for goods.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Company. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability and the assumptions the market participants would consider when pricing the asset or liability at the measurement date, assuming that market participants act in their best economic interest. The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. Fair value for measurement and/ or disclosure purposes in these financial statements is determined on such a basis, except for measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

Level 1 Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 Inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 Inputs are unobservable for the asset or liability.

2.3 Use of estimates and judgement

In preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS, management of the Company has made estimates, judgements and assumptions that affect the application of Accounting policies and reported amounts of assets, liabilities, income, expenses and disclosures relating to contingent liabilities as at the date of the financial statements. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively. Judgements are made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements. Assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment are reviewed on an ongoing basis.

Key source of estimation uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year in respect of useful lives of property, plant and equipment, provision for income tax and valuation of deferred tax assets/liabilities, provision for warranty and other provisions and contingent liabilities.

Useful lives of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense prospectively.

Provisions and Contingent Liabilities

A provision is recognized when the Company has a present obligation arising out of past events and it is probable that an outflow of economic resources would be required to settle the obligation and in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimates required to settle the obligation as at the balance sheet date. These are reviewed at each balance sheet date adjusted to reflect the current best estimates. Contingent liabilities are not recognized in the financial statements but are disclosed appropriately. A contingent asset is neither recognized nor disclosed in the financial statements.

2.4 Revenue recognition

Effective 01 April 2018, the Company adopted IND AS 115, 'Revenue from Contracts with Customers' using the modified retrospective method. In accordance with this, the comparatives have not been retrospectively adjusted and no material impact was recognised.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

Sale of goods

Revenue from the sale of goods is recognised when (i) the Company has transferred to the buyer the significant risks and rewards of ownership of the goods, (ii) effective control over the goods sold, (iii) the amount of revenue can be measured reliably; (iv) it is probable that the economic benefits associated with the transaction will flow to the Company; and (v) the costs incurred or to be incurred in respect of the transaction can be measured reliably. Sales returns are recognized as and when ascertained and are reduced from the sales turnover of the year. Amounts disclosed as revenue are net of Sales Tax, Goods & Service Tax, trade allowances, rebates and value added items.

Other income

Interest income- Interest Income is recognised and accounted on the basis of the effective Interest rate method.

Dividend Income- Dividend income is accounted for when the right to receive is established.

2.5 Foreign currencies

The functional currency of the Company is Indian Rupees.

Foreign currency transactions are recorded at the rates of exchange prevailing on the date of the transactions. Monetary assets and liabilities outstanding at the year-end are translated at the rate of exchange prevailing at the year-end and the gain or loss, is recognised in the Statement of Profit and Loss. Non monetary items of the Company are carried at historical cost.

2.6 Leases

Assets leased by the Company in its capacity as a lessee, wherein, substantially all the risks and rewards of ownership vest in the Company are classified as finance leases. Such leases are capitalised at the inception of the lease at the lower of the fair value or the present value of the minimum lease payments and a corresponding liability is created for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals under operating leases are recognised in the Statement of Profit and Loss on a straight-line basis over the lease term.

Assets taken on finance lease are capitalized, while lease charges on assets taken on operating lease are expensed.

2.7 Employee benefits

Employee benefits include contribution to provident fund, superannuation fund, gratuity fund, compensated absences and employee state insurance scheme.

Retirement benefit cost and termination benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Liabilities for gratuity funded in terms of a scheme administered by the life insurance corporation of India are determined using the projected unit credit method, with actuarial valuations being carried out at each balance sheet date. Remeasurement, comprising actuarial gains and losses and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and is not reclassified to the statement of profit and loss. Past service cost is recognized in the statement of profit and loss in the period of plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorized as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- Remeasurement

The Company presents the first two components of defined benefit costs in the statement of profit and loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

Defined contribution plan

Contribution to defined contribution plans are recognised as expense when employees have rendered services entitling them to such benefits.

Compensated absences

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognized at an actuarially determined liability at the present value of the defined benefit obligation as at the balance sheet date.

2.8 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax. Current and deferred tax are recognized in the statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years (Temporary Differences) and items that are never taxable or deductible (Permanent Differences). The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets include Minimum Alternate Tax ("MAT") paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set-off against future tax liability. Accordingly, MAT is recognised as deferred tax asset in the Balance sheet when the asset can be measured reliably and it is probable that the future economic benefit associated with the asset will be realized.

2.9 Property, plant and equipment

Property, plant and equipment are stated at costs less accumulated depreciation (other than freehold land) and impairment loss, if any.

The cost includes purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, other incidental expenses and interest on borrowings attributable to acquisition of qualifying property, plant and equipment up to the date the asset is ready for its intended use. Subsequent expenditure on property, plant and equipment after its purchase / completion is capitalized only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance.

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Lease rentals and premium for lease hold are amortized over the primary lease period.

Depreciation is provided for property, plant and equipment on the straight-line method over the estimated useful life from the date the assets are ready for intended use. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sale proceeds and the carrying amount of the asset and is recognised in statement of profit or loss.

Capital work in progress

Amount paid towards the acquisition of property, plant and equipment outstanding as of each reporting date and the cost of property, plant and equipment not ready for intended use before such date are disclosed under capital work-in-progress.

The capital work-in-progress are carried at cost, comprising direct cost, related incidental expenses and attributable interest.

2.10 Intangible assets

Intangible assets purchased are measured at cost as of the date of acquisition, as applicable, less accumulated amortization and accumulated impairment, if any.

Intangible assets are amortized on a straight line basis over their estimated useful lives from the date that they are available for use.

The estimated useful lives of the intangible assets and the amortization period are reviewed at the end of each financial year and the amortization period is revised to reflect the changed pattern, if any.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gain or loss arising from Derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised/disposed.

2.11 Impairment

Financial assets (other than at Fair Value)

The Company assesses at each date of balance sheet whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognizes lifetime expected losses for all contract assets and / or all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

Non-financial assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognized in the statement of profit and loss.

2.12 Inventory

Items of inventory are valued at lower of cost and net realizable value. Cost of raw materials, stores and spares, packing material and traded goods is determined on weighted average basis. In case of work-in-process and finished goods, cost includes an appropriate proportion of cost of conversion to bring the goods to its present condition. Net realisable value represents the estimated selling price for inventories less all estimated cost of completion and cost necessary to make the sale.

2.13 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of past events, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provision for warranty is estimated on the basis of past technical experience.

2.14 Investment in Subsidiaries

Investments in subsidiaries are carried at cost, less accumulated impairment losses, if any. Long-term investments are usually carried at cost. However, when there is a decline, other than temporary, in the value of a long term investment, the carrying amount is reduced to recognise the decline. Indicators of the value of an investment are obtained by reference to its market value, the investee's assets and results and the expected cash flows from the investment. The type and extent of the investor's stake in the investee are also taken into account. Restrictions on distributions by the investee or on disposal by the investor may affect the value attributed to the investment. Where there is a decline, other than temporary, in the carrying amounts of long term investments, the resultant reduction in the carrying amount is charged to the profit and loss statement. The reduction in carrying amount is reversed when there is a rise in the value of the investment, or if the reasons for the reduction no longer exist.

2.15 Financial Instruments

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through statement of profit and loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

A) Financial assets**Cash and cash equivalents**

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value

Financial assets at amortized cost

Financial assets are subsequently measured at amortized cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income (FVTOCI)

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset gives rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit and loss (FVTPL)

Financial assets are measured at fair value through profit and loss unless it is measured at amortized cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit and loss are immediately recognized in statement of profit and loss.

Foreign exchange gains and losses

The fair value of foreign assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period. For the foreign currency denominated financial assets measured at amortized cost and FVTPL, the exchange differences are recognized in statement of profit and loss.

B) Financial liabilities and Equity**Financial liabilities at amortized cost**

Financial liabilities are measured at amortized cost using effective interest method.

Equity instruments

An equity instrument is contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Equity instruments recognised by the Company are recognised at the proceeds received net off direct issue costs.

Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortized cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortized cost of the instruments and are recognized in "Other income"

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognized in the profit and loss.

2.16 Earnings per share (EPS)

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post-tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the period.

Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post-tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The dilutive potential equity shares are adjusted for the proceeds receivable had the shares been actually issued at fair value (i.e. average market value of the outstanding shares). Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for share splits / reverse share splits and bonus shares, as appropriate.

2.17 Segment reporting

The chief operating decision maker (CODM) identifies primary segments based on the dominant source, nature of risks and returns and the internal organization and management reporting structure. The operating segments are the segments for which separate financial information is available and for which operating profit/loss amounts are evaluated regularly by the executive Management in deciding how to allocate resources and in assessing performance.

The Company has only one reportable business segment, which is manufacture, purchase and sale of coir, foam and related products which constitutes a single business segment. Accordingly, the amounts appearing in the financial statements relate to the company's single business segment.

2.18 Research and development

All revenue expenditure related to research and development are charged to the respective heads on the Statement of Profit and Loss. Capital expenditure incurred on research and development is capitalised as property, plant and equipment and depreciated in accordance with the depreciation policy of the Company.

2.19 Insurance Claims

Insurance claims are accounted for on the basis of claims admitted/expected to be admitted and to the extent that the amount recoverable can be measured reliably and it is reasonable to expect ultimate collection.

2.20 New standards and interpretations not yet adopted

i) **Ind AS 116 'Leases'**: On March 30, 2019, the Ministry of Corporate Affairs notified the Companies (Indian Accounting Standards) Amendment Rules, 2019 containing Ind AS 116 – Leases and related amendments to other Ind ASs. Ind AS 116 replaces Ind AS 17 'Leases' and related interpretation and guidance. The standard sets out principles for recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. Currently, operating lease expenses are charged to the statement of profit and loss. The Standard also contains enhanced disclosure requirements for lessees. Ind AS 116 substantially carries forward the lessor accounting requirements as per Ind AS 17. Ind AS 116 is effective for annual periods beginning on or after April 1, 2019.

ii) **Appendix C to Ind AS 12, Uncertainty over Income Tax Treatments**: On March 30, 2019, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2019 containing Appendix C to Ind AS 12, Uncertainty over Income Tax Treatments which clarifies the application and measurement requirements in Ind AS 12 when there is uncertainty over income tax treatments. The current and deferred tax asset or liability shall be recognized and measured by applying the requirements in Ind AS 12 based on the taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates determined by applying this appendix. The amendment is effective for annual periods beginning on or after April 1, 2019.

iii) **Amendment to Ind AS 19 'Employee Benefits'**: On March 30, 2019, the Ministry of Corporate Affairs has notified limited amendments to Ind AS 19 'Employee Benefits' in connection with accounting for plan amendments, curtailments and settlements. The amendments require an entity to use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendment, curtailment or settlement and to recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling. The amendment will come into force for accounting periods beginning on or after April 1, 2019.

iv) **Amendment to Ind AS 12 'Income Taxes'**: On March 30, 2019, the Ministry of Corporate Affairs has notified limited amendments to Ind AS 12 'Income Taxes'. The amendments require an entity to recognise the income tax consequences of dividends as defined in Ind AS 109 when it recognises a liability to pay a dividend. The income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity shall recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events. The amendment will come into force for accounting periods beginning on or after April 1, 2019.

The Company is evaluating the effect of the above pronouncements on its financial statements.

The Company uses the intrinsic value method to account for the stock compensation cost. The fair value of stock based awards to employees is calculated through the use of option pricing models, requiring subjective assumptions which greatly affect the calculated values. The said fair value of the options has been calculated using Black- Scholes option pricing model, considering the expected term of the options to be 7 years, an expected dividend yield of 0.5 % on the underlying equity shares, volatility in the equity share price of 12 % and a risk free rate of 7%. The Company's calculations are based on a single option valuation approach. The expected volatility has been based on the volatility of listed enterprises in the consumer industry for which share price information was available.

The difference between the fair price of the equity share underlying the options granted on the date of grant of option and the exercise price of the option (being the intrinsic value of the option) representing Stock compensation expense aggregating to ₹ 435.58 Lakhs was accounted in the Statement of Profit and Loss of financial year 2015-16 as "Expense on employee stock option (ESOP) scheme" and in the Balance sheet as "Share options outstanding account" under Note 11.

Particulars	₹ in Lakhs	
	As at 31 March, 2019	As at 31 March, 2018
Fixed-rate Instruments		
<i>Financial assets</i>		
Balance with banks held in deposit account	1,120.77	220.50
Variable-rate Instruments		
<i>Financial liabilities</i>		
Borrowings from bank & other parties	672.21	377.75
Borrowings from related parties	696.00	1,124.89

Interest rate sensitivity analysis

Financial instruments affected by interest rate changes include Secured Long term loans from banks, Secured Long term loans from others and Secured Short term loans from banks. The impact of a 1% change in interest rates on the profit of an annual period will be Rs. 0.34 Lakhs (Previous year: Rs.0.34 Lakhs) assuming the loans at each year end remain constant during the respective years. This computation does not involve a revaluation of the fair value of loans as a consequence of changes in interest rates. The computation also assumes that an increase in interest rates on floating rate liabilities will not necessarily involve an increase in interest rates on floating rate financial assets.
